

Minimum Accounting

Just what you need to run your business

Minimum Accounting (MIN) accurately tracks income, expenses and profitability. MIN is designed to be a simple package for users who want to easily and accurately account for their income, expenses and profitability. MIN supports income and expense entries in multiple currencies. MIN does not use any accounting jargon and does not require a complicated setup. MIN users simply enter their income and expenses as they occur and MIN does the rest. MIN prepares income, expense and profitability reports and charts with just a few clicks.

In short, Minimum Accounting is *just* what you need to run your business.
